Localization and Monitoring Using
Passive RF on the Internet-of-Things

Advisors: Dr. Bill Mongan and Dr. Chris Tralie

Kacey La

# Setup

- Installing a Linux virtual machine (Ubuntu)

- Installing OpenWRT

- Connecting to the router

- Running experiments

Demo! ▬ ☐ ✕

- RSSI (Received Signal Strength Indicator)
  - Imagine the WiFi signal indicator on your phone!

Next Steps!

- Await the next set of routers and install the CSI tool firmware!
- Run experiments with the CSI (Channel State Information)
  - Contains more geometric information about the WiFi signal such as the phase and amplitude the signal was received
